

Communication Skills Test

Legos

Material Needed:

- 2 identical sets of leggos
- 2 walkie-talkie sets
- Timer

Directions:

1. Science Specialist in Mission Control will construct any model of their choice using their set of the leggos.
2. Once model is completed, mission control science specialist will begin to instruct shuttle science specialist using verbal communications only.
3. The objective is for the shuttle science specialist, through good verbal communication, to be able to construct a model identical to that of mission control.
4. This activity will be timed.

Guidelines:

1. Mission Control may only repeat a direction twice.
2. Shuttle...No asking questions.
3. Must complete in maximum 1 hour.

Assessment:

1. Was this activity successful? Why or why not?

2. If you could make any changes, what would they be?

3. Did you experience any feelings of anxiety? Were you angry, aggravated, frustrated, calm, nervous, or any other emotion?
