

# ACTIVdirections

## How to Use the Appearance Option to Modify Image Color and Transparency

### Getting Started

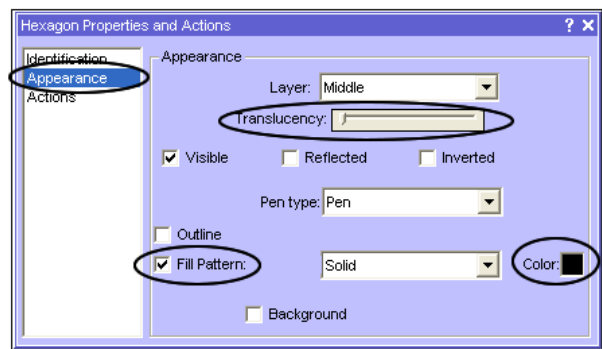

1. Open ACTIVstudio 2 and select the flipchart button to open a new flipchart.
2. Open the Resource Library and select Shared Shapes.
3. Drag a drag a black shape onto the flipchart.
4. Double click on the image to open the Object Edit Toolbar.

Properties

5. Select Properties on the toolbar as shown above. Properties allows you to edit the appearance and behavior of the selected object.

6. In the Properties and Actions window select Appearance in the left pane. Change the color of the shape. Slide the translucency bar to the right to make the shape transparent.

7. To change the shape to an outlined shape, deselect Fill Pattern and select Outline. You can change the pen or highlighter color and width as shown on the right.
