

Dreamweaver: Inserting Images and Hyperlinks

Quickly insert images or photos and attach hyperlinks to text, images or files.

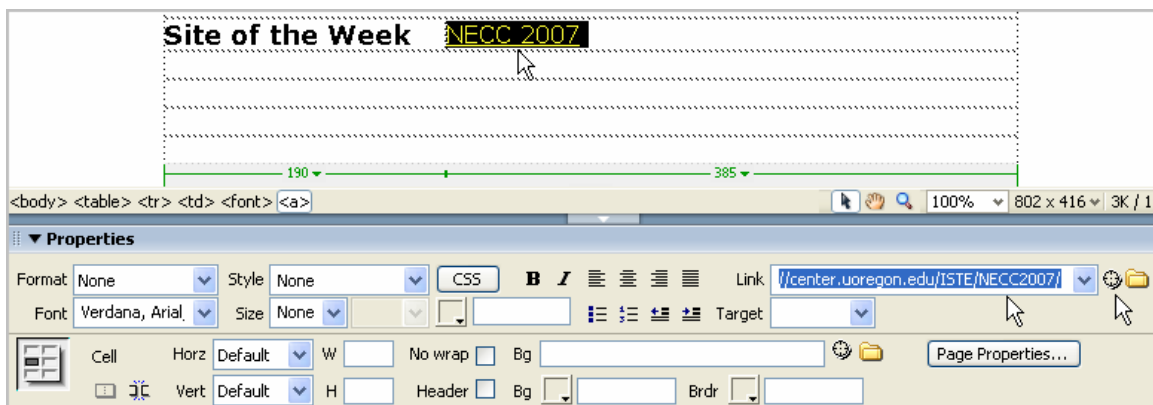

Inserting an Image or Photo

1. Insert the cursor where the desired image or photo will be placed.
2. On the menu bar select Insert>Image and navigate to the image or select the Insert Image icon on the Common toolbar as shown below.

Inserting a Hyperlink

1. Highlight or select the text or image you want to be the link and in the Properties Inspector, enter the the link (URL) of the file or site.
2. You can also use the Point to File option when linking to a file.

3. Hyperlink properties can be edited by selecting Page Properties>Links.
4. On that same window there is an option to select four different Underline Styles:
 - Always underline
 - Never underline
 - Show underline only on rollover
 - Hide underline or rollover
